Education

08/2024 – Present

Bachelor of Science in Information Technology,
University of San Carlos - Talamban Campus

08/2022 – 05/2024

Senior High School — STEM Strand, *University of San Carlos - North Campus*
Gen. Maxilom Avenue

08/2018 – 05/2024

High School, *University of San Carlos - North Campus*
Gen. Maxilom Avenue

Technical Skills

Frontend Development
HTML, CSS, JavaScript, Typescript, React

Backend Development
Node.js, Express.js, PHP, Laravel

Mobile Development
Android Studio, Java

Database
MariaDB, MongoDB

DevOps & Deployment
Git, GitHub, Render

Networking
IPv4, DHCP, Router/AP Configuration, Inter-VLAN routing

Projects

Route66, *Gas Station Locator & Fuel Price Application*
Android Studio, Node.js, Express.js, MongoDB, REST API, Google Maps API, Git/GitHub, Render

- Developed a mobile application that allows users to locate nearby gas stations and view fuel prices
- Developed and integrated RESTful APIs for retrieving gas station, fuel, and price-history data.
- Configured MongoDB for storing and managing application data.
- Implemented MongoDB collections for gas stations, fuels, users, and price history
- Deployed the backend API using Render and managed source code with Git/GitHub.
- Implemented website functionality for gas station users, including managing relevant station and fuel information.

EzPA, *Apartment Management System*
HTML, CSS, PHP, JavaScript, MariaDB

- Configured and managed the application's database.
- Implemented user authentication and session management for tenant and landlord accounts.
- Developed role-based functionality and access for different user types.
- Implemented CRUD (Create, Read, Update, Delete) operations to manage and retrieve user-related data.
- Built backend functionality for handling user requests and database interactions.

Korean-Resto POS System, *POS System*
HTML, CSS, PHP, JavaScript, MariaDB

- Configured and managed the application's database.
- Developed and implemented an ordering system for processing and managing customer orders.
- Implemented user authentication and role-based functionality.
- Created system features based on user roles.

JBL Headphones App Clone, *Mobile App*

Android Studio, Java,

- Developed a functional clone of an existing application to practice UI development and application architecture.
- Recreated core features such as device controls, equalizer settings, and headphone customization.

Certificates

- CCNA: Switching, Routing, and Wireless Essentials 2025
- Skills to Succeed Academy, Accenture 2025
